Set up Apple Pay on your iPhone

You can start using Apple Pay as soon as you add a debit card to Passbook. Here’s what you need:

- iPhone 6 or iPhone 6 Plus
- iOS 8.1 or later
- United States as your selected region
- Touch ID or passcode on your device
- iCloud account

To set up Apple Pay on your iPhone 6 or iPhone 6 Plus use the steps below:

1. Open Passbook and Click on “Set up Apple Pay.” Enter your Apple ID.

2. You can choose to set up an existing card filed with iTunes, or use a different debit card.
3. If you have a supported Connections Credit Union debit card on file with iTunes, enter the card’s security code. Otherwise, use the camera to capture the information on your debit card. Then fill in any additional information needed, including the card security code. **Please note—the camera will not work on non-embossed cards or “flat” cards. The card information will need to be entered manually. Read and accept the Terms and Conditions associated with using Apple Pay with your Connections Credit Union debit card.

4. Tap Next. We will verify your information and decide if it can be added immediately to Apple Pay. Otherwise, you will be prompted to call the Credit Union to complete the authorization process. You can identify your Connections Credit Union debit card at any time by looking at the last four digits shown on the card image.
5. After your card is verified, tap Next. You can start using Apple Pay.

To add another card, tap the + next to Apple Pay in the upper-right corner. On your iPad, tap Add Credit or Debit Card.

Change your default card

If you have more than one card set up for Apple Pay, you can select which card will be your default card by going into Settings > Passbook & Apple Pay. Tap on Default Card.
Update your card information, addresses, and contact information

You can change the addresses, email, or phone number you use for paying within apps at any time. Go to Settings > Passbook & Apple Pay to update your information. To update the billing address for a card, go to Settings > Passbook & Apple Pay, tap a card, then tap the billing address.

Remove a card

You can remove a card from Apple Pay at any time. Go to Settings > Passbook & Apple Pay, tap the card that you want to remove, then tap Remove Card.
Get help if your device is lost or stolen

You can remove your credit or debit cards from Apple Pay on iCloud.com. Just sign in, click Settings, choose your device, and remove your cards in the Apple Pay section.

If Find My iPhone is turned on, you can also help keep your data secure in these ways:

- Turn on Lost Mode to lock your device and suspend Apple Pay.
- Erase your device remotely to prevent anyone else from accessing the data on your missing device and to remove your cards.

You can also call the credit union to suspend or remove your cards from Apple Pay.
